▶ **SCHEDULE YOUR CONFERENCE**

Toll Free Reservations – Making a reservation is as simple as dialing. You will be connected with one of our helpful Reservationists who will walk you through the process and answer any of your questions.

Call Notification – Provide us with the names and telephone numbers of your participants and an Operator will notify them of the conference details. Call Notification ensures that participants are aware of the call and places an atmosphere of importance around the conference.

Event Registration – Event Registration helps you manage your large conferences and keep track of participants. You decide what information you would like to gather from each registrant and choose from handy options such as Email Reminders and custom-scripted messages. With both Phone and Web access to choose from, you can construct an Event Registration program that best suits your needs.

Recurring Call – If you conduct regularly scheduled conferences, then Recurring Call will save you time. A reservation is automatically generated for as long as you like. Recurring Call is ideal for daily, weekly or monthly team meetings and project updates. There is no charge if you skip a conference.

PAC Codes – If your business relies on billable hours, Global Link PAC Codes will make you more efficient. PAC Codes make it easy to bill your conferencing minutes back to your clients. They are ideal for attorneys, consultants and other professionals who track projects by cost center. Every time you make a reservation, we can capture your expense center, department, or location. This information will appear on your monthly invoice.

Fax/Email Confirmation – Fax/Email Confirmation lets you double-check the specifics of your conference. You will receive a confirmation of your conference details via fax and/or email, whatever you prefer.

▶ **BROADCAST AND RECORD YOUR CONFERENCE**

Web Conferencing – Add visuals and interaction to your audio conference. You control a slide presentation from your desktop while your audience accesses it via the web. Web Conferencing gives you the ability to collaborate on documents, share applications, poll your audience, tour the web and much more.

Webcasting – Rely on Webcasting when you need to broadcast your message to the widest audience possible. Your conference is accessible live via the Internet and can be archived for later playback. Present only the audio portion of your call or add slides – the choice is yours.

Encore – Encore digitally records your call for anyone who was unable to attend it live or would like to listen again. It is available via a toll-free number for easy, 24/7 access. Convenient and time saving, Encore is one of our most popular features.

CD/Taping – We capture your event on a CD, cassette, microcassette or DAT to provide you with a high-quality recording of the call for your archives.

Transcription – Receive a written record of what was said during the conference. Transcriptions are helpful for identifying sound bytes and quotes for post-event press releases.

▶ **ENTER YOUR CONFERENCE**

International – Expand your global reach with Global Link 's International Conferencing Solutions. We offer four methods to connect your international participants to your conference call, including links through our international call centers, toll and toll-free access numbers and a Dial Out option.

Dial Out – Give your conference participants the VIP treatment. Dial Out delivers your conference call to your participants rather than requiring them to dial into the call. You provide us with the names and telephone numbers of your participants and an Operator will make sure that they join your conference.

Direct Entry – Select Direct Entry to quickly join an audio conference. It allows participants to immediately enter the conference and start speaking before the call officially begins. Direct Entry is suggested for informal conferences.

Music Entry – Participants are placed on music hold until the conference begins. Music Entry creates a formal atmosphere for the conference.

Entry/Exit Tones – Participants hear a tone whenever a new participant enters or exits the conference. It lets everyone know that a new participant has joined or left the conference without interrupting the conversation.

Announce – An Operator announces participants' names when they join the conference, letting everyone know who is on the call. Announce makes it easy for you to keep track of your call's audience.

Roll Call – An Operator broadcasts the names of all participants who have joined the call. Roll Call confirms that all expected participants are in attendance.

Leader First/Last – Leader First creates a friendly atmosphere for the conference by letting you join the conference before your participants. It gives you the opportunity to greet participants as they join the call. Leader Last joins you to the conference after everyone else has arrived, Leader Last is recommended for large presentations and speaking events.

► ADMINISTER YOUR CONFERENCE

Subconference – Pre-selected guests join a private discussion before the conference begins. Subconference lets you review last-minute details, side issues and other non-public information. Communication Line – Speak with an Operator outside of the main conference to convey behind-the-scenes information, orchestrate guest speakers or give timing cues. A Communication Line makes it easier to manage a large conference.

Fax/Email Broadcast – Send pre- or post-event documents to all of your guests simultaneously via fax or email. Fax/Email Broadcast guarantees that all of your participants receive your information before and/or after a conference.

Promotional Tape – Send Global Link a tape for your participants to hear while they wait for the conference to begin. A Promotional Tape sets the tone for your call and can provide participants with relevant information about the speaker or conference topic.

Voice Talent – Screened and trained Operators provide voice-over quality talent, lending a professional touch to high-profile conferences. Voice Talent is beneficial for media-facing events or conferences hosted by your firm's upper management.

Custom Script – Craft a special message for a welcome statement, Q&A session and/or closing comments. The Operator reads your script during your conference. Custom Scripts offer you another way to personalize your calls.

Encore Emporium – Encore Emporium organizes your Encore recordings in an easy-to-use, customized menu that is accessible through a toll-free number. Encore Emporium is frequently used to organize training lectures and sales updates.

Encore Digital Recording Studio – Encore Digital Recording Studio enables you to deliver your message without holding a conference call. Record, review and edit your message by dialing into the Encore recording system and using your telephone keypad to enter commands. The recording is accessible 24/7 by dialing a toll-free number. Digital Recording Studio is an easy and flexible way to craft messages for your audience.

Group Mute/Unmute – You can silence all participants' lines by pressing a keypad command on your telephone or by instructing your Operator. Group Mute/Unmute helps reduce background noise and limits interruptions during your conference.

Self-Mute/Unmute – Participants can silence their own telephone lines by pressing a keypad command on their telephones. Self-Mute/Unmute reduces background noise from cell phones, speakerphones, etc.

▶ **GATHER DATA FOR YOUR CONFERENCE**

Leader-View – Leader-View uses a simple web-based interface to give you a private, real-time view of the participants on your call. You can view the names of individuals waiting to ask a question and other pertinent information. Leader-View effectively manages Investor Relations and other public conferences.

Polling – An Operator surveys all conference participants. You determine the questions prior to the conference and participants respond via their telephone keypads. Polling allows you to collect instant feedback and increases participants' involvement in the call. You receive a report with all responses that is organized by question and participant.

Question & Answer Session – Give your participants the opportunity to ask questions during the conference. Participants indicate that they have a question using their telephone keypad, while the Operator manages the question queue in a professional and orderly fashion.

Facts Complete – Before joining participants to the conference, an Operator collects the name of each participant plus two additional pieces of information that you determine. The information will be sent to you via fax or email along with on-the-line times for each participant.

Encore Plus – This polling tool allows participants who are listening to your Encore replay to respond to recorded questions via their telephone keypads. The responses are transcribed and sent to you in a report. Encore Plus can be used in conjunction with basic Encore or Encore Digital Recording Studio.

Encore Voice Prompts – Participants can leave open-ended messages after dialing into an Encore recording. Encore Voice Prompts are used to capture a listener's name, their company's name or comments about the recording. The responses are transcribed and sent to you in a report.

Encore Reports – Capture information about anyone who accessed your Encore recording. The information is transcribed and sent to you for your records.

▶ **SECURE YOUR CONFERENCE**

Conference Lock – You can prevent additional participants, even the Operator, from joining the conference by pressing a command on your telephone keypad. Conference Lock gives you the freedom to discuss confidential information in a secure environment.

Password/Passcode – Participants must provide the Operator with a pre-determined word or code to join the conference. You determine the Password/Passcode before the start of the conference. Password/Passcode restricts attendance and heightens security.
