

# MEETINGCENTER

In today's fast-paced business environment, making decisions quickly and efficiently is critical to maintaining a competitive advantage. Time wasted scheduling in-person meetings, making travel arrangements, and bringing together a globally dispersed team can mean lost revenue and increased operating costs. Every minute counts.

With MeetingCenter web conferencing from Global Link, you can increase effectiveness and productivity—across your entire company—and make faster, more accurate business decisions every day. Collaborate with employees, customers, and business partners from anywhere. MeetingCenter integrates data, voice and video content within a standard Web browser, so you can conduct real-time meetings over the Internet—simply and quickly.

## ► RELY ON MEETINGCENTER

- **Present** slides to make your meeting more memorable
- **Conduct** sales presentations or training sessions
- **Share** your latest sales and financial projections
- **Collaborate** on product plans and design specifications
- **Annotate** technical documents

## ► MEETINGCENTER FEATURES

**Document Sharing** View multiple PowerPoint presentations, documents or graphics without uploading the files to a server. Our unique Vector format allows for high resolution, multi-level zooming, and annotation capabilities.

**Support for Microsoft® PowerPoint™ Animation and Transitions** Share multiple PowerPoint presentations in a single meeting, with support for animation and slide transitions.

**Multimedia Content Sharing** Play back multimedia objects, including Flash and streaming video and audio, within PowerPoint presentations. Incorporate streaming multimedia from any Web site into your meeting.

**Application Viewing** Show any business-critical desktop application, without uploading files to a server. Present any application remotely, enhancing the effectiveness of live demos and team meetings.

**Application Sharing and Desktop Collaboration with Remote Control** Share anything on your desktop with an audience member to instantly solve customer support issues, conduct more effective live demos, and streamline project meetings.

**File Transfer** Presenters can easily pass documents to participants for download during a meeting.

**Polling** Allows presenter to solicit feedback from attendees via online survey responses.

**Video Integration** Incorporate real-time videoconferencing into your meeting using any desktop video camera. Stream video from a VCR, DVD player, or camcorder into your meeting.

**Record, Edit, and Play Back Meetings** Record an entire meeting or any desktop application for later reference, training purposes, or demos. Even edit the recorded session in preparation for playback and take ownership of your content. Once saved, participants can view and listen to the archive offline.

**High Performance and Reliability** With servers strategically dispersed at facilities around the globe, the MeetingCenter Interactive Network routes meetings through hubs that deliver reliable, secure, high-performance services. Presenters conduct multi-unit interactive meetings without latency or interruptions from anywhere in the world.

**Security** Support for SSL encryption enables you to securely conduct interactive meetings with even the most confidential information.
